

And as for children's study areas? [K&H Designs](#) created this effortlessly sweet space. 'For this young academic, a blue Tolix style chair sits beside simple linen curtains. The work space is separated from the bedroom area with a loft-style glazed screen, the shelving is a K&H bespoke design and saddlery leather was chosen to 'hang' the shelves. The work area is further defined with hand-blocked paper from Marthe Armitage, Hamilton Weston. We kept the joinery light and inviting with a pale-pink finish to continue the multi-layered pastel scheme throughout this little girl's bedroom.'
